

OUR MONTHLY FREE INTRODUCTORY TALK

Currently taught in ten countries, Brain Integration Treatment is successfully resolving brain and learning disorders around the world.

A growing number of healthcare professionals throughout Northern Colorado refer their clients to Open Pathways for treatment. Find out for yourself why!

We invite you to discover what Brain Integration Treatment can do for you or your family member.

We are not presenting our usual monthly free introductory talks during the summer months of 2009.

We will restart those programs in September.

Meanwhile, please call us at 970-416-6330 if you would like information about our services or wish to schedule a free phone consultation to discuss your needs and questions with Nancy.

Have a great Summer!
