

**LEARNING DIFFICULTIES?
ACADEMIC OR BEHAVIORAL PROBLEMS?
ADD, ADHD, DYSLEXIA?**

You're invited to learn about a revolutionary new & effective approach to treating root causes of learning and attention problems in children and adults

Designed for parents, teachers, and healthcare professionals, this presentation will introduce you to cutting-edge discoveries and treatment strategies for a wide range of learning, emotional, and brain dysfunctions.

This **FREE** talk will help you learn:

- ❑ What goes on in a healthy brain allowing its success
- ❑ How neurological, structural, biochemical, and emotional issues in the brain and body can affect brain functioning
- ❑ The essential role of neurotransmitters in the health of the brain and nervous system
- ❑ *Disruptors* of successful brain functioning, including: stress, poor diet, toxic chemicals, infections, structural problems, genetics, and brain pathway disintegration
- ❑ New and whole-body strategies to finding and treating root causes of learning and brain dysfunctions
